Idhasoft's SAP® Business All-in-One for High Tech Software Companies is based on the SAP ERP solution, and is designed to meet the needs of rapidly growing High Tech Software businesses with industry–specific requirements. The solution is pre-packaged and quickly implemented, allowing companies to gain the efficiencies of the largest SAP customers at a fraction of the cost.

Giving an integrated view of business, SAP Business All-in- One for High Tech Software helps to drive growth, optimize performance and maintain excellence. Our tools and methodology configure your system based on SAP's High Tech for Software Companies "Best Practices". With complete pre-configured settings, companies have everything they need to run specific key processes "out of the box" with minimal installation effort.

As a certified SAP® Gold Partner, Idhasoft is dedicated to providing expert advice with unrivaled service and support. Idhasoft's end-to-end implementation methodology is powered by a standardized process-based approached with a fixed price model, which often brings projects in under time as well as under budget resulting in a better return on investment.
