

<b>Client</b> World Leader in Industrial Manufacturing	<b>Location</b> United Kingdom
<b>The Goal</b> <ul style="list-style-type: none"><li>• To enable our client to develop a local presence, globally</li><li>• To enable management of personnel and processes across diverse geographic locations</li><li>• To meet these objectives by implementing an enterprise-wide SAP R/3 solution</li></ul>	
<b>The Challenge</b> <p>Our client is fortune 500 global organisation, specialising in Energy and Transport infrastructure projects. To remain competitive, the organization needed to have a local presence, worldwide. They needed to service the customers, across the world, from a local facility.</p> <p>As a consequence of this business decision, our client had offices and personnel scattered in different cities in the world. For a smooth functioning of the business, the headquarters had to facilitate collaboration across locations. This required a reliable &amp; robust access to systems, processes and data 24 hours a day 365 days a year. In response, the company decided to implement SAP R/3 as an integrated business system with Idhasoft as the chosen Partner for Implementation.</p>	
<b>Idhasoft Solution</b> <ul style="list-style-type: none"><li>• Phased implementation approach – Delivery of complete business solution in 3 phases (cutovers)</li><li>• Implementation of SAP R/3 for core business processes in Cutover 1</li><li>• Modules implemented in Cutover 1: FI, CO, PP, MM, SD, PS, QM</li><li>• Use of ASAP Implementation Methodology</li><li>• Trusted partnership approach</li><li>• Completed Business Blueprint Realisation &amp; Data Migration On-Time, On Budget</li></ul>	
<b>Benefits</b> <p>We completed the implementation On-Time, On Budget. 9 senior consultants from SAP audited the on-going SAP Implementation and Business Blueprint and endorsed our expertise in:</p> <ul style="list-style-type: none"><li>• Management of Project Mercury</li><li>• Idhasoft Consultant SAP experience</li><li>• Training provided to our client’s Business Process Team</li></ul>
