

Deliverables

- ▶ Requirements Matrix
- ▶ Information Architecture Diagram
- ▶ Wireframes (Page Layout Schematics)
- ▶ Visual Design Study
- ▶ Conceptual Solution Design
- ▶ Implementation Plan
- ▶ Implementation Roadmap

Benefits

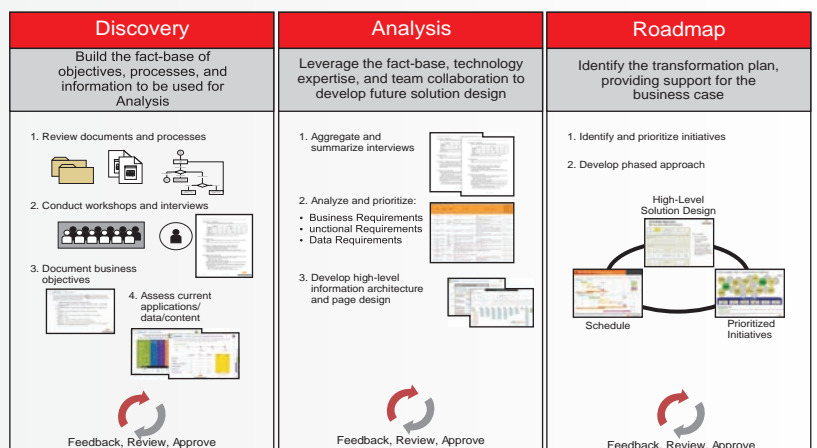

Using the Fastrack approach, we help companies:

- ▶ Jumpstart Enterprise Web projects with quick wins
- ▶ Achieve ROI by mitigating costs associated with site maintenance and sprawl
- ▶ Identify project opportunities where the platform can be applied to reduce costs or drive business
- ▶ Meet audience needs by mapping them to available content and functionality
- ▶ Receive a Roadmap to meet business objectives via the use of Enterprise Web technology

Fastrack is a proven approach to help companies leverage Web technologies to reduce costs and improve business agility. During Fastrack, we achieve a comprehensive understanding of the current state, define the future state potential, identify and prioritize requirements for that future state, identify any gaps and produce an Implementation Roadmap that clearly depicts how the organization and the technology infrastructure must evolve to achieve the desired future state.

Fastrack is comprised of the following phases:

Typical Effort

- ▶ Typical duration of 4-6 weeks
- ▶ Availability to start: typically within 2 weeks

Client Successes
