HIGH TECH

Adapt to Industry Changes and New Customer Expectations

Manufacturers of high-tech products must continually adapt to ever-changing industry and customer demands. Product lifecycles are shorter than ever, but the list of internal and external business requirements keeps getting longer. These inherent challenges make your selection of business management software especially critical in helping ensure you keep pace with market trends and ahead of competitors.

Idhasoft – High Tech delivers extensive advantages, including enterprise wide productivity gains, quality assurance improvements and customer service enhancements, based on the world's most sophisticated ERP functionality. This qualified SAP Business All-in-One solution can be efficiently implemented to enable rapid return on investment as well as immediate business benefits, ideally positioning you to more effectively tackle:

- ▶ Demand for aggressively priced products
- ▶ Compressed production cycles
- ▶ Rising cost of raw materials
- ▶ Increased global competition
- ▶ Rising cost of raw materials
- ▶ Tougher product forecasting and inventory management models

Idhasoft High Tech is the seamless solution for all aspects of your business, enabling you to establish and build on best practices as your company, its needs and the industry evolve.

- ▶ Planning
- ▶ Purchasing
- ▶ Inventory Management
- ▶ Sales Order Management
- ▶ Production & Logistics
- ▶ Quality Management
