

## Mobility Division

*Idhasoft Mobility Division, formerly Barcode Integration Management, is a barcode and RFID data collection systems integrator. We specialize in technologies that help enterprises boost their productivity and efficiency through the use of wireless technology, mobile handheld devices and barcode RFID printing systems.*

*Our Mobile Application software is a highly scalable, enterprise class solution designed to deploy a variety of mobile applications. Our solutions can be used for any mobile application across any department of your enterprise. With our single solution, customers can deploy inspections, surveys, work orders, proof of delivery, sales order entry and warehouse applications, etc. Understanding the effect mobility can have on a business and having the capabilities to get it done is a complex process, with a dynamic set of challenges. However, the effect of mobility is one with limitless potential for higher productivity, and efficiency.*

*Idhasoft Mobility Division is where business processes, leading-edge mobility and RFID solutions all converge to produce bottom-line business results. We position ourselves with the leading-edge hardware providers to achieve our commitment to deliver innovative hardware and software solution that leverage the full power of your enterprise software.*

*MD supports and offers wireless access points, switches, controllers, wireless cards, antennas and more. Whether it is 802.11b, 802.11g, or 802.11a, we provide site survey and installation services for wireless infrastructures.*
