

Business Intelligence

Oracle Business Intelligence in a Box -Total Solution

In today's uncertain global economy, organizations need to be able to gather and analyze key data elements to remain competitive and drive the necessary margins to remain profitable. Tracking and measurement of key corporate metrics are essential to manage cash flow and minimize risk.

As one of Oracle's premier Business Intelligence (BI) partners, Idhasoft has created an innovative offering to rapidly address these needs to help our customers optimize their decision making.

Our highly experienced team would like to offer your organization our 'Business Intelligence/BI in a Box' offering based on Oracle's extensive business intelligence platform, OBIEE. The goal of this offering is to provide our customers an accelerated, but highly relevant approach to address their analytics and reporting needs. As part of this effort, we provide a solution which includes dashboards and reports for the users, as well as using customer specific data to build a fully scalable platform that can drive immediate value and ROI.

Modules

The 'BI in a Box' solution will be deployed on one of the following modules including: Human Resources, Sales, Financials, Supply Chain, Marketing, Sales, Service/Contact Center and Order Management and Fulfillment.

Solution deliverables include:

- ▶ Summary Analytics:
 - ▶ 2 custom dashboards
- ▶ Management reporting:
 - ▶ 5-8 custom reports (data from these reports uses customer specific extracts and requirements)
- ▶ Line of Business/Operational reporting:
 - ▶ 10-12 standard reports
- ▶ Software components including one (1) year of technical support
 - ▶ 10 named users
 - ▶ BI Applications
 - ▶ OBIEE (framework for BI applications)
 - ▶ ETL Tools and Data Adapters
