

## Oracle Business Intelligence

### About Idhasoft

*Idhasoft, as a fastest growing technology company, provides end to end Oracle capabilities including, enterprise software licensing, professional and managed services.*

*Our award winning team has completed EBusiness Suite, Fusion, OBIEE/OBIA and Hyperion implementations for over 15 years as well as supporting the operational needs of our customers with offshore managed services and staffing.*

*Idhasoft has over 200 Oracle resources including professionals from Development, Training and Sales Management with standing memberships on several Oracle advisory committees. Also, several of our customers are featured references for Oracle as well as industry specific events.*

*“The moment we started the Oracle projects, Idhasoft has gone above and beyond my expectations. When we need help and assistance you're there. When we faced critical issues and show stoppers, you're there. We were looking for a partner who knows our business, been there, done that, flexibility during implementation and Idhasoft became just that.”*

**- David Villanueva,  
IT Director, Cortina**

Business Intelligence (BI) is a set of concepts, methodologies and technologies to improve decision making in business systems. It allows organizations to improve business performance by leveraging information about customers, suppliers, and internal business operations.

Idhasoft brings a comprehensive approach to meeting any business organization's objective of reporting and analysis of information. Our delivery team is comprised of experienced Oracle/Siebel Analytics architects and Hyperion experts, possessing extensive industry experience in implementing Oracle BI solutions. Our experts have in-depth Oracle Business Intelligence & Enterprise Applications expertise. With our strong background in data warehouse technologies coupled with our industry experiences in implementing various BI and ERP/CRM systems, our BI Experts have been helping customers to implement business intelligence solutions across all vertical applications.
